DETAILED ACTION

Allowable Subject Matter

1. Claims 1-7 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With regard to claims 1, 6, and 7, Stetz discloses an input (carrier) configured to receive from a radio broadcast station (sending cell phone) an audio quiz question (phone number, page 38 last paragraph) and a station ID (ESN, page 38 last paragraph), and from a radio signal receiver (receiving cell phone) a second ID (second ESN), judging the validity of all the IDs, (pages 38-39) and assigning customer information to the receiving station ID (for billing, page 43), and outputting the customer information for receiving the identified question (on the bill). Stetz discloses how cell phones work. In a cell network the first phone calls by the second's number to request a reply. When he does, both ESN numbers are matched with customer information for billing, and to allow the call to go through. When the second phone turns on, it is sending out its ID, and it's asked to reply to the question, being its phone number.

Applicant argued that the audio quiz question of Stetz does not read on the definition presented in the specification. The examiner finds applicant's arguments, along with citations of relevant parts of the specification, to be convincing. The phone number of Stetz does not read on the audio quiz question of the instant application read in light of the specification. It would not be obvious for one of ordinary skill in the art to have substituted the audio quiz question, as defined in the specification, with the phone number of Stetz, since there is no motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
